EXPERIENCE

STOCKZO | FRONT-END DEVELOPER

May 22 - June 22

Worked with the front-end of the website, created the UI and setup the login functionality using HTML, CSS, JavaScript.

RAIBHILO CONSULTANCY LLP FRONT-END DEVELOPER

July - Aug 2022

- Frontend-Developer
- Worked on the UI for the blogs page, added the data dynamically and integrated the code with backend, also built the login/signup page and google authentication using firebase.

PROJECTS:- | WEATHER-API WEB-APP

- Link to the website : // nehal-weather-app.netlify.app
- A React js weather app that can tell the current temperature of any city across the world in Farhenheit. Built with React js and Open Weather API.

| ECOMMERCE STORE

- Link to the website : // kadyanstore.netlify.app
- An Ecommerce Store named "Kadyan Store", having features such as filtration of products on the basis of prices, brand, category, colors, Add to cart option, etc.
- Website is responsive for all the mobile devices, ipad, etc. Technologies used -> React js and JavaScript.

| FRONTEND DESIGN FOR RESTAURANT WEBSITE

- Link to the website : // react-frontend-nehali.netlify.app
- A landing page of the website that is completely responsive for all devices.
- It has features such as slider, video playing in the background, a pause and play button to control the video.

INTERESTS

- Learning - I am very curious and I love expanding my knowledge.
- Frontend Development - Always open to learning new practices such as sass, tailwind css, typescript.
- Mobile App Development - Although I am new to mobile development, but so far I have really loved using React Native.
- Fitness - I prefer boxing, but I also enjoy weightlifting.

OBJECTIVE

To secure a position with a stable and profitable organization, where I can be a member of a team and utilize my technical learnings and experience to the fullest.
